WOODWORKERS AS BOAT BUILDERS AT THE CLASSIC BOAT SHOW IN SOUTH HAVEN, JUNE 16

The 31st Classic Boat Show at the Michigan Maritime Museum from 10 a.m. to 4 p.m. on Saturday, June 16 will feature examples of woodworkers as boat builders. The show includes wooden power, sail, rowing and paddle driven boats of traditional design and construction, as well as modern composite construction. In the past, it has featured over 30 boats each year ranging from restored Chris Crafts to wood-canvas and strip-composite canoes to an owner-built Venetian Sandolo. Anticipated wood working demonstrations and exhibits for this year's show are the use of a shave (shaving) horse, oar and paddle making, steam-bending, block and cleat making, tool sharpening and various types of boat building. There will be toy boat building for kids too. Admission is \$6 for adults and \$5 for seniors; kids are free. If you have a boat to bring, please use this registration form to sign up:

http://www.michiganmaritimemuseum.org/uploads/Registrationform_2012_01-1.pdf.

The Traditional Small Craft Chapter hosted by the Museum sponsors the show and welcomes a variety of boats finished and in progress. The Michigan Maritime Museum is located at 260 Dyckman Avenue on the Black River at the Bridge: www.MichiganMaritimeMuseum.org.

A nice addition to this year's Classic Boat Show will be the presence of the **Great Lakes Boat Building School (GLBBS) in Cedarville, Michigan**. They will be introducing their academic year programs to interested students and to wood workers interested in summer boat building courses in Cedarville. If you know anyone who might be interested in boat building as a career, please pass the word along. By the way, they have had middle-aged students pursuing a second career. High school and community colleges students will be admitted free to the Classic Boat Show on their school ID. The School's programs range from a year-long course to an Associate's Degree and a Bachelor's Degree with cooperating institutions of higher education. Two representatives will be at the show to talk to interested persons: Bud McIntire, student services counselor, and Pat Mahon, lead instructor/program director. At 1 p.m., they will be doing a Power-Point presentation on the School, its programs and the boats that have been completed and are under construction. More information regarding the GLBBS's year-long and summer programs is available on their web site at WWW.GREATLAKESBOATBUILDING.ORG.

**Questions to Sandy Bryson, Boat Show Coordinator at
sbryson@msu.edu or telephone: 517 351 5976.**

Members Projects

Member Del Jacobs is getting very close to completing his Model T Ford YORK #803 Suburban Body. Here is is working on the roof frame which has been delivered. He is delighted to get that large work table out of his shop, so he has room to move about.

Member Paul Henry working in his shop on his wooden boat. Don't forget that we would like to see you once in a while. Its been a long time since Benzie County Schools.

In case you missed it on the front page. We want you to bring to the meeting some of the woodworking jigs you have made or even purchased and show them to the club. You might just make some ones day and get them out of a bind in their shop

Are you a Doer or a Don't-er? Read Augie's article and find out.

The Doers

By Augie

The last meeting before summer is fast approaching. When I had my meeting and I am sure many of you who were there will remember since I try to show by example. I think most of you will believe me now when I say "Do as I say not as I do because I tell you from of experience".

The last meeting was good and bad, at least for me. I think I may have to get another tool. I am thinking of some applications for the cutting tool that was demoed by Ken. That tool is good because it is multi-functional and the accessories are not expensive. I am definitely going to keep that one in mind.

That was an excellent shaving horse Dan. I know they can be a joy to use. When you have a sharp draw knife and some good straight grain wood it is a pleasure to shape a piece of wood for a project.

When I did my meeting I mentioned the "bubba circle". I got to thinking about that term and it certainly applies to the EMWC. Collectively there is a lot of talent in this group.

Over the years with the club I have heard of some of the interesting things that members have done and things some of you are involved in. You are the "doers", a unique group of people who do not set on the side lines but get involved to get the job done. You are the ones people come to when something needs to get done. I am sure you are asked how you accomplish so much. If you are like me you don't watch much TV.

Some will take a new challenge and this is where the "bubba circle" comes in. You know that by taking on a new task that a problem may come up and you will be able to ask one of club the members for help. It is even possible you will learn something you did not know before. This is good because exercising the mind is beneficial just like physical exercise. Some of you are multi talented, I know because I have talked with some of you. You are the **doers**.

Do not forget the get together the first Saturday in June. It is a great setting and with some fine talented people.

So until fall have a great summer. I have to get back to work on my new challenge and will I be glad when it's finished. (It's not with wood).

EMW Classes for 2011 - 2012

Class	Instructor	Phone	Dates	Time	Bring Lunch
Compass Plane	Gene Munsell & Arnold Wagner	810-240-3710			
Coopering	To be announced	810-240-3710			
Bird House	Larry Sills	810-635-3784
