**Vegetables: Carrots**, as most of us know, are orange. However, carrots come in a spectrum of colors such as purple, red, yellow, and even white.

In Europe, the **eggplant** – also known as aubergine – was once thought to cause insanity and was known as the Mad Apple.

The word **broccoli** is derived from *brachium*, the Latin word for “arm”. It is a good source of Vitamin A and C, potassium, folacin, iron, and fiber.

## For Sale

### Jet 14" Band Saw: "Like new condition"

It was \$800 when new,  
now asking \$450 or "Or Best Offer"

Call EMW member  
Arthur Church (810) 308-1222

Picture of a "Dutchman Jig"

## Update: Del Jacobs at GLBBS

EMW - work has been progressing at a brisk pace here at GLBBS. We are now working on 4 different boats. The whaleboat planking is ongoing - I have included pictures of the boat with a "spiling plank" installed. Spiling planks are pieces cobbled together that receive reference marks from the hull with a spiling block that are placed on and then removed and then transferred to the actual plank that will be installed on the boat. Included pictures show a scarf joint (to make long planks out of shorter ones), a Dutchman jig and a plank being prepared to be installed on the whaleboat.

A new boat has been started called Rescue Minor, designed in 1942 and meant for rescuing wounded soldiers from beaches, but has been popular recently with recreational boaters. It has been featured in Wooden Boat magazine in the November 2010 issue with a interesting article. I have included pictures of the building platform and an aft and bow view of the boat as it looks today in the shop.

Planking continues of the "Chippewa" and "Chica" with oars being built and completed.

Del Jacobs (Proud member of EMW)

(I had to leave 2 of Del's pictures out because of space, will be on the next issue of newsletter. Dan)

**The Onion:** The ancient Egyptians worshipped the onion, and believed that the spherical shape and concentric rings embodied eternity. The onion was the only vegetable at the time to be crafted out of gold by Egyptian artists.

STEP STOOL WITH PULL OUT STEP	ARNOLD, ROSS, LARRY	810.569-0474	after new year	

**SPILING:** Spiling is one of those great tricks every amateur boat builder should know. Not only does it allow you to create new planks quickly, easily and with a great degree of accuracy, but also makes you seem very clever and skillful to the uninitiated. You might feel that way about it yourself.

Spiling is used to plank a boat from scratch, replace a plank, shape bulkheads, or any other task which requires one piece to fit tightly within the confines of others. To do this you will need a pair of marking dividers, battens such as those used in the lofting process to draw a fair curve, and one more item called a spiling batten. This is any flat, flexible piece of stock, such as plywood or a plank planed thin, that will fit inside the space to be filled with at least an inch or so to spare all around. Pieces with a slight curve cut into them may fit into place better than straight ones when wrapped around the frames.
